Opis produktu

Opis PIC Delicate plaster antibacterial for 8x50cm wound. Delicate plasters for wound care, suitable for delicate skin. Single-use product (for use once by one patient). Do not reuse, as there is a risk of infection and loss of plaster properties. Properties of PIC Delicate plasters: The dressing contains chlorhexidine with a broad spectrum of antibacterial activity - the plaster helps protect wounds from infection. Recommended for delicate skin. Exceptionally breathable. The dressing does not adhere to the wound. Plasters are also available in white 8 x 50 cm for easy removal of the plaster, it should be moistened with warm water for a few minutes to facilitate its removal from the skin.
